Subj: Limited First Article Tests for Enhanced Small Arms Protective Insert (ESAPI) Model
MP2S2 Under Contracts M67854-04-D-3005/3118

Ref: FAR 52.209-4 First Article Approval -Governmental Testing- Alternate I

Dear Mr. Miller:

The Limited First Article Test (FAT) units for ESAPI model MP2S2 submitted to H.P. White Laboratories, Inc. to allow Armorworks to utilize the same ceramic tiles produced by Morgan using a different green forming process are hereby approved.

This approval is based on an analysis of test data provided to the Government in report number HPWLI 10858-49A for a limited FAT, and the recommendation of the Project Engineer with the concurrence of the Program Office. The Government is currently receiving model MP2S2. The items provided for this FAT represent a process change only that will allow for increased yields from Morgan will enable Armorworks to keep the delivery volume as low as possible.

Production is hereby authorized. All production quantities submitted shall be produced using the same procedures that resulted in the manufacture of an acceptable first article as referenced above; this includes the same raw material and component parts. Approval of the first article does not relieve you from meeting all requirements of the contract and the performance specification.

Please address any questions or concerns that you have regarding this letter to me at (703) 432-3265.

Sincerely,

LISANDRA TORRES
Contracting Officer

Armorworks
